SUMMARY

Full Stack Software Developer with experience in building real-time projects using Java, JavaScript, React, React Native, and Node.js. Skilled in developing scalable applications, secure REST APIs, and database-driven systems. Completed CDAC from Sunbeam, Pune.

SKILLS

- **Programming:** Java, JavaScript, Python, C++, C
- **Web & Mobile:** React, Angular, Ionic, Android, iOS
- **Backend:** Spring Boot, Hibernate, Django, Flask, ASP.NET, Node.js, Express
- **Database:** MySQL, Firebase
- **Web Technologies:** HTML, CSS, Responsive Design, REST APIs
- **Tools:** Git, GitHub, Postman, Android Studio, VS Code, Xcode
- **Core Concepts:** OOP, Data Structures & Algorithms, MVC Architecture

WORK EXPERIENCE

- **Android Developer Intern — Sharnex** Jan 2026 – Present
Remote (Noida, Uttar Pradesh)
 - Developing and maintaining mobile application UI and API for the Sharnex platform.
 - Integrated RESTful APIs with frontend to enable dynamic and real-time data handling.
 - Designed and implemented multiple application screens including authentication, dashboards, and user workflows.
 - Focused on responsive design, performance optimization, and reusable component architecture.
 - Collaborated with backend team to ensure seamless API communication and data consistency.
- **Java Developer Intern — Anvistar ITS Pvt. Ltd.** Dec 2024 – Feb 2025
Pune, India
 - Developed a full-stack Dairy Shop Management System using Java Servlets and MySQL.
 - Built responsive UI using HTML, CSS, and JavaScript.
 - Implemented authentication, billing, stock management, and session handling.
 - Automated daily operations, improving efficiency and reducing manual workload.

PROJECTS

- **Green Grow — Smart Agriculture Platform (CDAC Project)**
 - Developed a role-based full-stack web application using React, Node.js, Firebase Authentication, and Firestore.
 - Implemented secure JWT-based authentication with protected dashboards for farmers and buyers.
 - Integrated real-time market rates, weather insights, and agricultural news modules.
 - Designed RESTful APIs and implemented role-based access control for secure data handling.
- **Blog Management System (Hackathon) — React, Node.js, Express, MySQL**
 - Built a full-stack blog platform with secure CRUD operations and user authentication.
 - Designed and integrated RESTful APIs with MySQL database.
 - Developed responsive UI using React with search and category filtering features.
- **Food Ordering App — Android (Java, Firebase)**
 - Developed an Android-based food ordering application using Java and Firebase.
 - Implemented user authentication, restaurant browsing, cart management, and order placement features.
 - Integrated Firebase Realtime Database for real-time order tracking and updates.
- **Smart Dustbin for Food Detection — ML + IoT**
 - Built a machine learning-based food detection system using Raspberry Pi and OpenCV.
 - Automated lid operation using ultrasonic sensors and servo motor integration.
 - Improved waste segregation efficiency through image-based classification.

EDUCATION

- **PG Diploma in Mobile Computing (PG-DMC), CDAC Sunbeam Pune** 2026
Percentage: 63%
- **B.E. Information Technology, SPPU** 2025
CGPA: 7.15
- **HSC — Late B.P. Patil College of Engineering** 2021
Percentage: 63%
- **SSC — Pimpalgaon High School** 2019
Percentage: 73%

PUBLICATION

- Salt — Smart Dustbin with Food Detection for Waste Reduction, published in *TANZ Journal* (ISSN: 1869-7720).

LANGUAGE

English, Hindi, Marathi

HOBBIES

Cricket, Watching Movies
